

Specification Sheet

Product Name	HabiStat Crested Gecko Substrate, 10L
Product Codes	HSCG10E
Description	The HabiStat Crested Gecko blend has been formulated with a bespoke blend of organic soils to replicate the soft underlayer of the rainforest, such as those found in New Caledonia, where this species is endemic. This unique blend comes pre-hydrated, to already start increasing the humidity as soon as it's added, helping maintain overall air humidity. It offers great moisture retention, slowly releasing humidity throughout the day and creating vital microclimates for bioactive systems. Ready to use straight from the bag for a natural and enriching crested gecko habitat.
Intended Use	Animal use only
Available weight	3.93KG (Weight may vary due to fluctuating moisture levels)
Key Ingredients	Organic peat, composted bark fines, fine bark chip
Technical Specifications	NA
Instructions for proper use	Spread substrate evenly across the vivarium base ensuring a depth of at least 2-3" (5-7.5cm). Do not overfill if using underfloor heating. We recommend you spot clean daily, and change or refresh every 6-12 months.
Precautions for use	Wear protective clothing like gloves when handling substrate and supervise children closely. Bags may be heavy.
Storage & Handling instructions	Please store this product out of reach from children.
Manufacturers Information	Monkfield Nutrition Ltd, Arthur Rickwood Farm, Chatteris Road, Mepal, Ely, Cambs, CB6 2AZ, UK
