

Specification Sheet

Product Name	HabiStat Natural Snake Substrate, 10L
Product Codes	HSNS10E
Description	The HabiStat Natural Snake blend has been designed to replicate a vast range of habitats which colubrid snakes inhabit. From mountain ranges to forests, humid loving species to dryland species, this formula can be a home to all. With a unique blend of sands, clay and soils, when used correctly this substrate can hold moisture and maintain burrows, whilst maintaining a dry surface layer like you would find in the wild. The HabiStat substrate range now comes pre-hydrated, which temporarily increases humidity and supports humid underlayers. Ready to use straight from the bag for a naturalistic, enriching habitat.
Intended Use	Animal use only
Available weight	5.96KG (Weight may vary due to fluctuating moisture levels)
Key Ingredients	Composted bark fines, sand, soil, fine bark chip, clay
Technical Specifications	NA
Instructions for proper use	Spread substrate evenly across the vivarium base ensuring a depth of at least 2-3" (5-7.5cm). Do not overfill if using underfloor heating. We recommend you spot clean daily, and change or refresh every 6-12 months.
Precautions for use	Wear protective clothing like gloves when handling substrate and supervise children closely. Bags may be heavy.
Storage & Handling instructions	Please store this product out of reach from children.
Manufacturers Information	Monkfield Nutrition Ltd, Arthur Rickwood Farm, Chatteris Road, Mepal, Ely, Cambs, CB6 2AZ, UK
